UNION VISION FACTORY FOR METAL INDUSTRIES**

A PART OF UBC (UNION BUILDING CONTRACTING)

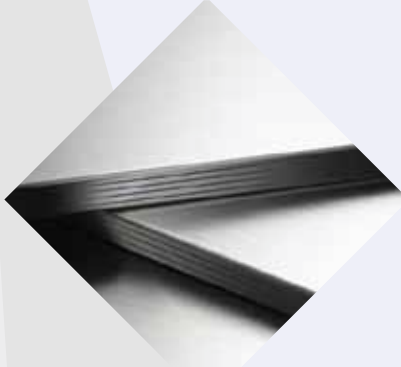

ABOUT UVMetals:

Union Vision Factory for Metal Industries. (UVMetals) is a Part of Union Buildings Construction Co. (UBC), started operation in 2016 in Kingdom of Saudi Arabia with continue expansion program as Union Building Construction

UV Metals is specialized unit of UBC for producing Steel / Stainless Steel products as well as Highly Equipped Machining Division with All conventional & CNC machines and we are capable to design the product & system to fulfill the needs of the clients with quality and safe working environment and satisfy them with our great service.

OUR GOALS: UVMetals is most trusted name in the Industrial, commercial, operation and maintenance projects and also fabrication services. We stand for Quality and professional approach. Quality and safe working environment is our core policy to during the execution of projects. UVMetals never compromises over quality of work and health and safety of its staff.

Our experienced and well- qualified technical team is available for your project for Processing, Fabrication, Automation, Installation, maintenance and repair work and equipment, as well as the supply of it's spare parts and ancillary items

OUR STRENGTH:

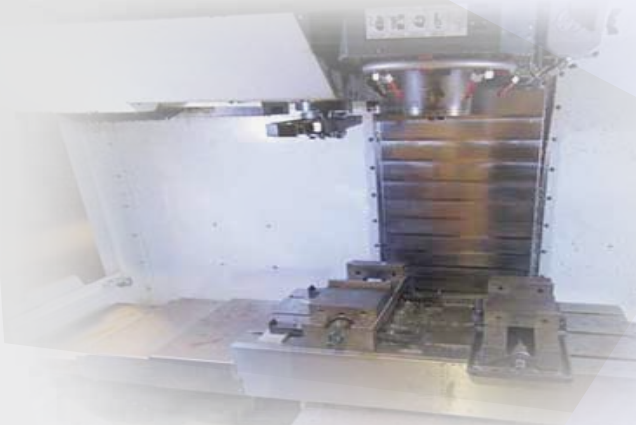

- 1- Able to provide professional support on long & short terms basis in various field.
- 2 - Experience in engineering, contracting, operation and maintenance projects.
- 3 - Highly motivated and efficient professional set up of engineers and craft men ship in the Precision Machining, Fabrication, Erection projects.

FABRICATION DIVISION : We provide all kind of Steel / Stainless Steel, Structure, Piping, Silos, Tank, Vessel, Tanker, Bunkers, Chute, Containers Fabrication services. We include a competitive, specialized design that will ensure the best option for a cost effective, appropriate solution.

MACHINE SHOP DIVISION : UVMetals Provides quality services and our machine shop is fully equipped with state of art machineries e.g Conventional and CNC machines and Plating , Chrome facilities etc.

QUALITY & SAFETY : We highly belief in Quality & safety practice by implementing strictly on design, material selections, production / machining process and during Assembly / Installation and Operation and Process Qualification needed by Industry.

MACHINE SHOP DIVISION:

UVMetals has specialized and Commercial tool room dedicated to serve the manufacturers in the Kingdom Of Saudi Arabia in precise tooling and engineering parts. We provide quality, on time delivery and precise tooling supply service to our wide range of clients serving in different industries like Pharmaceutical, Food, Plastic and Packaging.

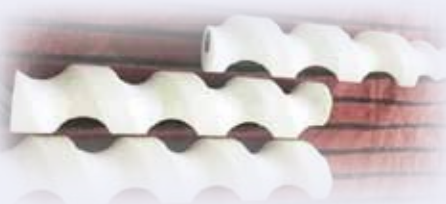

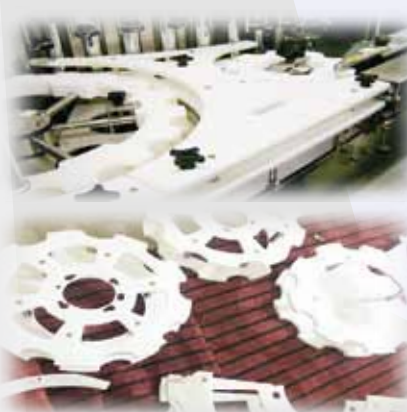

DESIGNING & MANUFACTURING: We includes competitive, specialized Engineering Capabilities in house to Model 3D new Blister Cards, Design Blister Pockets and determine required change parts.

We are fully capable in house 3D model for complete chain of Packaging Line as per customer demands of their blister packing as well as Liquid filling, Capping, Labeling, Cartoning, Capsule filling tube filling etc.

FILLING & PACKAGING: We are specialized in filling and all kind of packaging and conveyor equipment for the beverage as well as the food industry. For drying your packed products, we supply a large range of systems and drying installations, which can be integrated in your production line. Our total care concept doesn't only consist of delivering products.

DIES & MOLD / JIG & FIXTURES TOOLING: Our highly qualified design team enhanced by state of the art CAD and simulation systems by using advanced CAM software is a base of quality tooling needs with best solutions. We are serving wide range of industries in tool making enriched our design and manufacturing experts to create quality solutions for Press tools, High Pressure Die-Casting, Injection and Blow molds. After sales service and warranty of our products is a key assurance of our best quality services and reason of long term business with us.

OEM CHANGE PARTS & SPARES: UVMetals is expert in manufacturing of change parts for packaging and filling industries. We provide best technical support and we have capable to duplicate your production line for new product also reliable alternative parts as well as copy of OEM parts.

QUALITY & SAFETY: UVMetals belief in Quality, safety as well as its dimensionally accurate features. In addition, these products can be easily customized to meet customer's specifications and specific requirements.

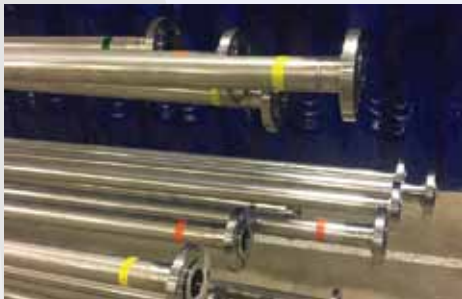

FACILITY: Our Tool room is equipped with advanced CAD / CAM Software with all Conventional Machines, CNC Millings, EDMs, Aluminum Anodizing & Hard Chrome Plant as well.

FABRICATION DIVISION:

We are capable to fabricate all kind of Steel / Stainless Steel, Structure, Piping, Silos, Tank, Vessel, Tanker, Bunkers, Chute, Containers Fabrication services. We include a On Site Tank fabrication & Piping. We provide strategic on-site fabrication solutions for projects of all levels of complexity and the knowledge and experience paired with highly skilled personnel, innovative equipment and a company-wide commitment to do our best for our customers. We are well qualified and committed to meeting the needs of our customers and focused on providing a safe and efficient working environment.

STAINLESS STEEL PRODUCTS: Stainless steels resistance to corrosion and staining, low maintenance, relatively inexpensive, and familiar luster make it an ideal base material for a host of commercial applications, major appliances, industrial equipment and building material in sky scrapers and large buildings. We produce by use of Tungsten Inert Gas (TIG), Metal Inert Gas (MIG) and Shielded Metal Arc Welding (SMAW). Stainless steel fabrication poses distinctive challenges Stainless steel is a valuable scrap material. It is 100% Eco-friendly.

PROJECT CONSULTING & DESIGNING: Our major strengths is our ability to use our relationships in various industries to offer local support to enhance our client's business activities. We include a competitive, specialized Process / Tank, Piping, water treatments & Utilities solution provider that will ensure the best option for a cost effective, appropriate solution. We carefully plan our designs to statically construct them to examine for any issues before proceeding with manufacturing to avoid costly mistakes and delays

CARBON STEEL / UL / FILTER TANKS: UVM are also fabricating above and underground flammable liquid tanks with Fire code based designing, installing, applicable tank and related.

SAFETY POLICY : UVMetals recognize occupational health and safety as an integral part of our business performance. To start this occupational health and safety regimen, we established objectives, made plans and targets in terms of occupational health and safety.

FACILITY: Our factory has equipped with advanced Machinery e.g, Auto Welding plants, Plasma , Cutting , Bending , rolling and many more.

QUALITY POLICY: Quality has been the keystone of our achievement. To ensure that our valued customers receive our product and equipment without defect, we build, inspect and rigorously test for raw material that is sourced from reliable vendors and is duly checked by our expert staff to ensure they are at a level equivalent with and meeting international standards.
